Free on-line Battery Training

Industrial Batteries (UK) Limited – IBLUK – has added to their website a section with an on-line battery training option.

This on-line battery training is based on the IBLUK one-day in-house introductory training package for personnel involved with industrial battery installations and systems. It is a simplified free version of the in-house course and is supplied on an unsupported basis for those who would like to further their knowledge.

The training gives an overview of all the major areas of battery knowledge including:

- Battery History
- Battery Technology Basics
- Nickel-Cadmium Battery Construction
- Battery Technology Comparison
- Life Cycle Costing
- Capacity and Performance Basics
- Battery Sizing Principles
- Installation and Maintenance
- Capacity and Performance Testing

The course uses Flash[®] based presentations and does not require any download.

The level of the training is sufficient for anyone looking for a comprehensive overview of industrial batteries. If users wish to go beyond this, IBLUK have two further options available.

IBLUK will shortly to launch a CD-ROM based training programme. This is an extended version of the on-line system with more in-depth content. The programme will include self testing questions for each section. The CD-ROM will be registered to 1 user, and is allowed to be used for 2 other, unregistered, users. The registered user is entitled to 1 years support.

IBLUK also offer in-house training which takes place at their premises and is suitable for groups of 4 or more.

For information on these courses, please visit the Battery Training page at the Industrial Batteries (UK) Website, www.ibluk.co.uk.

Industrial Batteries (UK) Limited - IBLUK – is the main distributor of Alcad Industrial Nickel-Cadmium Batteries in the United Kingdom. The comprehensive Alcad range includes Vantex ultra-low maintenance range for low and medium rate discharge applications, which is ideal for this application.

In addition to assisting the customer in their choice of battery and battery stand, IBLUK also offer an extensive selection of approved accessories, a technical consultancy service, user training and a battery replacement and recycling service.
